	QUALITY AND ENVIRONMENTAL POLICY	Revisión nº 5 Página 1 / 1

The company vision is to be a "global leader in the energy industry curing" ensuring its success and permanence, taking into account the following three basic aspects:

1. Develop all our actions and thoughts always focused on the needs and expectations of our customers.
2. Continuously improve the effectiveness of our systems from the identification and control of our mistakes and also from the feedback we have from our staff and our customers.
3. Progress in corporate culture and do everything possible to develop individual capabilities through training programs. Promote personal initiative, teamwork and continuous improvement, spreading into all levels of our structure objectives, goals and programs and the criteria of our Quality and Environmental Management.

We want to ensure customer satisfaction through having high competitive capacity of our quality and environmental standards. To achieve this purpose, the objectives we plan periodically are based on the following premises:

- To meet the requirements of customers by offering a comprehensive and thorough service.
- Continuously improve to ensure our competitiveness.
- Reduce the rate of nonconformity to zero through a strict process control.
- Develop new products through constant technological innovation.
- Pollution prevention based on the assessment of potential risks to the environment at each stage of the processes, minimizing the environmental impact as far as possible.
- Continuous improvement of environmental performance management through the setting and monitoring of environmental objectives.
- Guarantee the responsible and eco-efficient use of natural resources to reduce the consumption of fossil fuels, water, energy and other resources.
- Minimize waste generation. Reduce consumption, reuse and recycle materials when possible and dispose of waste appropriately and responsibly.
- Apply processes that reduce the environmental impact of our activity, protect the environment and assess in advance the environmental impact of new activities or services.
- Training and awareness-raising through training and consciousness-raising activities for employees.

Management is committed to continuous improvement of the effectiveness of our Quality and Environmental Management System and to meet customer requirements and legal and regulatory requirements.
